

Holiday Shopping Tips for Consumers

Online shopping is more popular than ever. With cyber-attacks on the rise this holiday season, consumers need to know how to stay cyber ready.

Follow these key tips to **reduce your risk** and stay cyber ready when shopping online.

Tip #1

Don't Use Public Wifi

The best way to shop online is to use a secure private network. Using public wifi may expose sensitive data like passwords or bank information.

Tip #2

Monitor Your Bank Statements

Be sure to check your bank statements to ensure no unauthorized transactions have taken place.

Tip #3

Use Credit Not Debit

Credit cards have less risk for online purchases than debit cards, as there are more protections for the consumers.

Tip #4

Watch for Holiday Phishing

Remain vigilant for text and email phishing scams disguised as great sales offers.

Is your organization Cyber Ready?

Discover how you can create your own policies to prepare for, respond to, and recover from a ransomware attack.
